

SLIDE 1

Problem & why it matters

Team name:

Problem statement (e.g. A2 — Ageing in place):

The problem in one sentence:

Who is affected, and how badly (use a number from open data):

Why it matters now:

SLIDE 2

Solution & data

Your solution in one sentence:

Who uses it, and what decision it changes:

Datasets you will use (name + source, e.g. data.gov.sg):

- 1.
- 2.
- 3.

What makes your approach different from a generic dashboard:

SLIDE 3

Databricks architecture & impact

Pipeline: source → ingestion → transform → model / analytics → output

(Name the Databricks components: Lakeflow, Delta, Unity Catalog, SQL / AI-BI, Genie, MLflow, Apps)

The user-facing output you will demo:

Measurable impact if it worked:

What you can realistically finish in the two-week sprint:
